Why choose us?

The ice spraying process is continuous and smooth, the handheld parts are ergonomically designed, and the control panel is simple and easy to use.

- Dry cleaning, easy to operate
- Clean and pollution-free
- Intelligent adjustment of ice output
- Non-destructive cleaning
- Energy-saving, environmentally friendly, and highly efficient cleaning

Ice outlet pipe

Air inlet pipe

Protective masks

Earmuffs

Ground clamp

Spare switch

Protective gloves

Ice shovel

Product details Description display

Exquisite technology and attention to detail
Every detail is strictly controlled

The operation handle is equipped with anti-dumb protection switch, safe operation, free switching of ice blasting and air blasting, with irradiation lamp;

This dry ice-specific cryogenic hose features a quick-connect plug, is resistant to high pressure and low temperatures, and offers improved flexibility for more comfortable cleaning of the top of the head and more demanding angles.

Static protection function;

Well-Qualified
And Confirmed By

Ice spraying process is continuous and smooth, hand-held components in line with the ergonomic design, the operating panel is simple, easy to get started;

The whole machine shell and structure are stainless steel, durable;

Independent space design ensures electrical safety and durability; maintenance-free design, and guaranteed performance and quality stability.
